In cooperation with the German Association of International Cooperation (GIZ) and based on a developPPP contract, the Severin Craftsman Training Center offers five Industrial Artisan Courses for craftsmen professions. The Training Center aims to teach less of theoretical knowledge but more of manual skills with an immediate benefit to the students. In dependence on the dual education, courses for electricians, plumbers, masons, carpenters and metalworkers are offered. Only trainers certified by TVETA and trained according to German industrial training standards are teaching. Besides theoretical courses in two classrooms practical courses are conducted by the preventive maintenance programs (PMP) for buildings and machines carried out by Severin Sea Lodge. After successful completion of the course the students may undertake Ministry of Education certification exam at a TVET / DIT Centre.

Interested candidates must complete the application form for enrolment.
